

SHAKTHI JASHWANTH CH

Bengaluru, Karnataka – 560061 · +91 7483692066

shakthi.jashwanth@gmail.com ·  Shakthi Jashwanth ·  Shakthi Jashwanth

Education

B.M.S College of Engineering, Bengaluru

Bachelor of Engineering in Computer Science (Data Science)

Oct 2023 – Present

CGPA: 9.134

Experience

Machine Learning Project Intern

IEEE Computer Society Bangalore Chapter

Apr 2025 – Sept 2025

Guide: Dr. Pavan Kumar C, IIIT Dharwad

- Built a multilingual cyberbullying detection and intervention system to flag unsafe content and suggest safer rewrites.
- Trained mBERT/RobERTa for detection, achieving 87.3% F1 on Dravidian and 84% F1 on English.
- Implemented hate-type classification (Religion, Age, Gender, Ethnicity, Other) with >90% precision/recall.
- Fine-tuned T5-base for toxicity reranking (ROUGE-L 0.89, BLEU 0.82).

Projects

• **MindVault – Personal Knowledge Management System**

 GitHub

- Designed a **Retrieval-Augmented Generation (RAG)** system enabling high-accuracy semantic search and context-aware QA over large-scale personal knowledge bases.
- Architected automated document ingestion and retrieval orchestrations using **Langflow**, with **Astra DB** powering vector embedding storage and low-latency retrieval.
- Developed a unified system layout encompassing a responsive web interface alongside a native **Kotlin Android application** for secure, cross-platform knowledge access.

• **KirinAI – Gmail Workflow Reimagined** (*In-Progress*)

 GitHub

 Live Demo

- Developing a full-stack Chrome Extension (Manifest V3) and React web app to turn messy placement emails into an organized Kanban board with real-time updates.
- Building an asynchronous **FastAPI** backend integrated with the Gmail Watch API and GCP Pub/Sub for live, event-driven email parsing, using **Redis** for reliable data handling.
- Designing an email triage pipeline that pairs a fast, user-defined rule engine with a context-gathering AI agent for ambiguous emails – using sender history and past user corrections to adaptively filter spam/noise while balancing latency and cost.

Technical Skills

Programming Languages: Python, JavaScript, SQL, Kotlin

Frameworks & Architecture: FastAPI, Node.js, REST APIs

Databases & Infrastructure: PostgreSQL, Redis, MongoDB, Astra DB

Tools & Platforms: Git, GitHub, Postman, Figma, Jupyter Notebook

Leadership and Extracurricular

- **Joint-Secretary - D-Sync:** Data Science Club, BMSCE. Actively volunteered and campaigned for BMSCE's technical fest, **PHASESHIFT**, and cultural fest, **UTSAV**, contributing to event promotion and organization.
- **Coordinator and Volunteer:** Coordinated and volunteered in various events hosted by **D-Sync**, ensuring smooth execution and participant engagement.
- **Active IEEE Student Member:** Participating in workshops, technical sessions, and cross-chapter collaborations.
